UC San Diego Chancellor's Scholars Program

Professor Mel Green Peer Mentoring Award
Award Recipient - 2021

Andrew Hu
2019 Cohort
Warren College
Computer Science

Andrew Hu has served as an Energy & Waste intern at UC San Diego Student Sustainability Collective, and as a Data Analytics Intern at the U.S. State Department. He will be joining Appriss as a Software Engineer Intern for Summer 2021.

Andrew was the 2020-2021 Vice Social Chair for the UC San Diego Chancellor's Scholars Alliance. He will serve as the 2021-2022 Chancellor's Scholars Alliance President. Throughout his first 2 years at UCSD, and as part of the CSA Peer Mentorship Program, Andrew saw the importance of building community into the different students organizations he was a part of. He implemented this thinking in his approach to peer mentorship.

Andrew's mentees shared the following about their mentoring relationship:

"Andrew has been very helpful and friendly with me. We talked about many things in our meetings, including how to survive in college. I learn quite a bit about his freshman experience in college and gave me tips. We got to know each other pretty well, and I feel comfortable talking to him."

"I had a good experience with Andrew. It was nice hearing about the school and classes from someone in my major. I liked that he advised me about their prior experiences and how classes were for him."
