

UC San Diego Chancellor's Scholars Program

Professor Mel Green Peer Mentoring Award Award Recipient - 2016

Winnie Shi
2014 Cohort
Revelle College
Bioengineering

Winnie Shi served as a Research Intern at UC Riverside's MacREU during summer 2016. The following summer, she continued her research experience as an Undergraduate Research Student at the Osaka University Graduate School of Engineering's Bio-Inspired Chemical Engineering Laboratory. She conducted image analysis at UCSD under direction of Dr. Collins, and served as Vice Chair for the UCSD Chancellor's Scholars Alliance Peer Mentoring Program.

Winnie is currently a Doctoral Student at Rice University.

Winnie's mentee shared the following about their mentoring relationship:

"My first meeting with my mentor was memorable because we had a good lunch together and she walked me to a new class I had trouble finding. She's always open to my questions about college life, reaches out to me when there are CSP/CSA events, and is someone I feel I can easily and gladly approach when I need mentorship. She was the first to reach out to me and from then on, we started messaging each other about college life. She gave me advices about study habits or what classes to take. I thought it was going to be awkward, but she was really friendly so we got along really well. I am grateful to have her as my peer mentor."
